|-----------|--|-----|
| Foreword  | <i>Antonio V. Delgado-Escueta</i>  | VII |
| Preface   | <i>The Editors</i>   | IX  |
| Chapter 1 | The history of progressive myoclonus epilepsies<br><i>Pierre Genton, Pasquale Striano and Berge A. Minassian</i>   | 1   |
| Chapter 2 | Neurophysiology of myoclonus and progressive myoclonus epilepsies<br><i>Giuliano Avanzini, Hiroshi Shibasaki, Guido Rubboli, Laura Canafoglia, Ferruccio Panzica, Silvana Franceschetti and Mark Hallett</i>                         | 11  |
| Chapter 3 | Unverricht-Lundborg disease<br><i>Arielle Crespel, Edoardo Ferlazzo, Silvana Franceschetti, Pierre Genton, Riadh Gouider, Reetta Kälviäinen, Miikka Korja, Maria K. Lehtinen, Esa Mervaala, Michele Simonato and Annika Vaarmann</i> | 35  |
| Chapter 4 | Lafora disease<br><i>Julie Turnbull, Pasquale Striano, Pierre Genton, Stirling Carpenter, Cameron A. Ackerley and Berge A. Minassian</i>   | 49  |
| Chapter 5 | SCARB2/LIMP2 deficiency in action myoclonus-renal failure syndrome<br><i>Leanne M. Dibbens, Michael Schwake, Paul Saftig and Guido Rubboli</i>   | 79  |
| Chapter 6 | Neuronal ceroid lipofuscinoses<br><i>Dragos A. Nita, Sara E. Mole and Berge A. Minassian</i>   | 93  |
| Chapter 7 | Sialidoses<br><i>Silvana Franceschetti and Laura Canafoglia</i>  | 115 |
| Chapter 8 | Myoclonic epilepsy in mitochondrial disorders<br><i>Costanza Lamperti and Massimo Zeviani</i>  | 121 |
| Chapter 9 | Progressive myoclonic epilepsy associated with neuroserpin inclusion bodies (neuroserpinosis)<br><i>Benoit D. Roussel, David A. Lomas and Damian C. Crowther</i>   | 133 |

|            |  |     |
|------------|--|-----|
| Chapter 10 | <i>GOSR2</i> : a progressive myoclonus epilepsy gene<br><i>Leanne M. Dibbens and Guido Rubboli</i>   | 143 |
| Chapter 11 | <i>KCTD7</i> -related progressive myoclonic epilepsy<br><i>Patrick Van Bogaert</i>   | 149 |
| Chapter 12 | Autosomal recessive progressive myoclonus epilepsy due to impaired ceramide synthesis<br><i>Edoardo Ferlazzo, Pasquale Striano, Domenico Italiano, Tiziana Calarese, Sara Gasparini, Nicola Vanni, Floriana Fruscione, Pierre Genton and Federico Zara</i> | 155 |
| Chapter 13 | Spinal muscular atrophy associated with progressive myoclonic epilepsy<br><i>Haluk Topaloglu and Judith Melki</i>  | 165 |
| Chapter 14 | Myoclonus epilepsy and ataxia due to potassium channel mutation (MEAK) is caused by heterozygous <i>KCNC1</i> mutations<br><i>Fábio A. Nascimento and Danielle M. Andrade</i>  | 173 |
| Chapter 15 | Autosomal dominant cortical tremor, myoclonus and epilepsy<br><i>Pasquale Striano and Federico Zara</i>  | 179 |
| Chapter 16 | Myoclonus and seizures in PMEs: pharmacology and therapeutic trials<br><i>Roberto Michelucci, Elena Pasini, Patrizia Riguzzi, Eva Andermann, Reetta Kälviäinen and Pierre Genton</i>   | 187 |
| Chapter 17 | Post-modern therapeutic approaches for progressive myoclonus epilepsy<br><i>Berge A. Minassian</i>   | 199 |
